

OmniMind AI — Multi-Agent Executive Report

Workflow: **Integration Test Workflow** | ID: 78e64162... | Generated: August 08, 2026 11:45 UTC

Workflow Objective & Goal

"Verify multi-agent workflow execution engine via API"

Agent Execution Summary & Outputs

Task Node	Assigned Agent	Output & Action Taken
plan	Orchestrator	Action: decomposed_task_into_plan {'plan': [{'id': 'task_1', 'description': "Gather context and search information for: Decompose goal: 'Verify multi-agent workflow execution engine via API'", 'agent_type': 'rag'}, {'id': 'task_2', 'description': 'Perform data analysis or tool execution based on retrieved context', 'agent_type': 'worker'}, {'id': 'task_3', 'description': 'Validate, review, and assemble final answer', 'agent_type': 'reviewer'}], 'analysis': "[Mock LLM Response] Processed query: 'Decompose goal: 'Verify multi-agen
knowledge_retrieval	RAGSpecialist	Action: queried_chromadb_pdf_store {'query': 'Retrieve relevant knowledge from private documents for: Verify multi-agent workflow execution engine via API', 'documents': [{'id': 'sample_enterprise_policy.pdf_page_1_0_cb2964', 'content': 'OmniMind AI Private Enterprise Security & RAG Policy\nDocument ID: POL-2026-X89 Classification: CONFIDENTIAL\n1. Executive Summary\nOmniMind AI provides autonomous multi-agent execution with private document intelligence.\nAll private PDF files ingested into ChromaDB are stored with page-level
execution	Worker	Action: direct_reasoning Successfully executed work for task: 'Execute the main task based on plan and retrieved knowledge: Verify multi-agent workflow execution engine via API'
review	Reviewer	Action: validated_and_approved {'is_approved': True, 'quality_score': 0.98, 'feedback': 'All task requirements verified successfully with high confidence.', 'context_inspected': ['dep_outputs', 'shared_state']}
